Education

- **(Sep '16 - Aug '18)** University of Waterloo: MMath (Thesis) in Computer Science. *CGPA: 92/100*
  - Research Assistant in the Data Systems Group. *Research Area*: Information Retrieval, Supervised by Dr. Mark Smucker
  - Teaching Assistant for CS489 (Intro to Machine Learning - F17, S18), CS442 (Principles of Programming Languages - W17, W18)
- **(Jul '11 - May '15)** Birla Institute of Technology, Mesra: B.E. in Computer Science and Engineering. *CGPA: 80/100*

Work Experience

- **Machine Learning Engineer | Bloomberg LP** (Oct'18-Present). Working on ranking problems in search and query autocomplete; "Learning to Rank" infrastructure, quality and explanability.
- **Software Engineer | Media.net, Directi** (July'15-August'16). Worked on a contextual e-commerce advertising product for which I built an e-commerce search engine optimized for performance and ad revenue.
- **Software Engineering Intern | Media.net, Directi** (May'14-July'14). Generalized a crucial component of the ad serving architecture for multiple languages; an auto taxonomy system which enabled extraction of high performance ad keywords from pages. Was offered full time position based on the project.

Technical Knowledge

- C/C++; Python; BASH; Javascript; Java;
- Linux; Git; Solr/Elasticsearch; Scikit-learn; Web (Full Stack)
- Information Retrieval; Natural Language Processing; Machine Learning;

Selected Publications

- **Refresh Strategies in Continuous Active Learning.** *SIGIR 2018 workshop on Professional Search.* N Ghelani, GV Cormack, and MD Smucker.
- **A System for Efficient High-Recall Retrieval.** *ACM SIGIR 2018.* M Abualsaud, N Ghelani, H Zhang, MD Smucker, GV Cormack and MR Grossman.
- **Event Detection on Curated Tweet Streams.** *ACM SIGIR 2017.* N Ghelani, S Mohammed, S Wang, and J Lin.
- **Effective user interaction for high-recall retrieval: Less is more.** *CIKM 2018.* H Zhang, M Abualsaud, N Ghelani, MD Smucker, GV Cormack, MR Grossman.
- **Mixed Script Ad-hoc Retrieval using Back Transliteration and Phrase Matching through Bigram Indexing.** *FIRE Workshop. 2015.* N Ghelani, SK Saha, and A Prakash.

Selected Projects

- **HiCAL**: A high performance C++ implementation of a Continuous Active Learning based TAR (Technology Assisted Review) technique.
- **Supervised Classification of Competitive Programming Questions**: Various machine learning models (using tensorflow and scikit-learn) and their evaluation for classifying solutions of programming questions.
- **Affective Emojis**: Mapping emojis to an affective space based on their usage in twitter.
- **DoTA 2 Twitch Recommender**: A backend-less web based system which recommends Twitch Streamers with similar playstyle (in DoTA 2) given a user profile.
- **shuffle.py**: Fork of the shuffle-ng project I currently maintain; complete support for ipod shuffle 4g under Linux.

Extra

- Have won and performed in numerous programming competitions
  - Member of Waterloo Red ACM ICPC Team - Finished 8th in 2016 East Central NA Regionals
  - 5th in ACM ICPC 2013 Kharagpur regionals, 10th in ACM ICPC 2014 Kharagpur regionals
- Ranked 3rd in Citadel & Correlation One Waterloo Datathon 2017
- President, ACM BIT Mesra Student Chapter for the session 2014-15
